

Technical notes

This page is not of interest to SABG members or others interested in southern African bulbs. It is intended for any authorised user maintaining the SABG website.

Web hosting

The web-site is hosted in the UK by [Kualo Ltd.](#), who say they provide “fast, secure & rock-solid hosting”, a claim backed by a “99.9% Uptime Guarantee” and many positive reviews. They also have strong environmental credentials as mentioned above.

The software used to manage the web site (and sends the pages to your web browser) is [DokuWiki](#). This is “wiki” software which will make it easier to maintain and update, and in due course make it possible for members to contribute directly.

Web content

Page footer

The page footer which appears on every page is at sabg.uk/conf/pagefooter.html. It requires editing at least every January to change the year in the copyright statement. It may not be used by all templates, but appears when the mindthedark template is in use. See [template:dokuwiki#customizing](#).
